

Discover the automotive technician career

WHAT is the automotive technician career?

Build an excellent skillset

Technicians constantly interact with customers, computers and cars – the skills technicians build in this career are in high demand, and transfer to a well-rounded skillset.

Growing demand of high-tech workforce

Vehicles are rapidly changing – technicians are challenged daily to adapt to evolving technology and topics. The automotive industry needs technicians who love technology and computers, and that demand continues to grow.

WHY choose the automotive technician career?

Great Pay & Advancement Opportunities

Many technicians today receive attractive compensation packages, including signing bonuses, competitive salaries, and enhanced benefits. There's also room for career growth, both within the dealership and at the brand level.

Earn Faster with Less Debt

Jump-start a career and earn money faster. Automotive technicians attend 2-year schools instead of a 4-year college – saving more, earning sooner, and gaining experience faster.

HOW can the student in my life get started?

Start Now

While technicians require a 2-year degree, students can join programs to try out the career. Go to our website to find out how to get involved today at GoProjectShift.com

What is needed for a degree?

There are multiple ways to become an automotive technician, allowing students the flexibility to choose the program that works best for them!

- **Manufacturer programs:** Start earning while still in high school. Work in a brand-specific program and make money right after graduation!
- **Community college:** Complete a degree in two years for a lower cost. Earn money faster than your peers and gain job experience sooner.
- **For Profit College:** Earn your certification as an automotive technician quickly - it typically takes around a year to complete! Start your career quicker and boost your earnings earlier.

The Dealership Difference

Original Equipment Manufacturers (OEMs) are industry leaders who focus on producing the next generation of automotive vehicles. These are the car brands you see on the road and read about in the paper – building autonomous vehicles, reducing greenhouse emissions, and changing the world.

There are numerous benefits to working for an OEM dealership: higher pay and better benefits, access to the newest technology, sponsored training, and of course, getting to work on your favorite cars.
